-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of group II, claims 44-48, in the reply filed on 21 October 2008 is acknowledged.
2. Claims 25-43 have been withdrawn as being drawn to a non-elected invention.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claim 44 is rejected under 35 U.S.C. 102(e) as being anticipated by Den et al. (US 2003/0197456).

Den et al. teach a device comprising: a substrate having first and second contact surfaces (82 and 83, Fig. 11b, par. 166); and a conductor structure connected to the first and second contact surfaces of the substrate the conductor structure having nanotubes which are aligned to extend from the first contact surface to the second contact surface (carbon nanotubes, 24, extend from the first electrode 82, to the second electrode, 83, Fig. 11A, and serve as conductors, par. 167-171).

Art Unit: 1641

With respect to claims 45 and 46, Den et al. teach the conductor structure being an electrical conductor structure (par. 171) wherein the nanotubes are carbon (par. 167).

Regarding claim 47, Den et al. teach the nanotubes being substantially identical (all of the nanotubes, 24, Fig. 11A, are made of carbon and are made by the same method and are therefore substantially identical, par. 167).

With respect to claim 48, Den et al. teach the substrate being silicon, which is a semiconductor material (par. 141).

Conclusion

No claims are allowed.
